As paying customers, we should have the right to listen to our choice of channels. Local radio may be fine and ideal for many people but not for everyone, and we shouldn't be forced to only listen to the selection of stations approved by a government body just to appease the local radio business community. Local radio stations do not satisfy me as a radio listener or as a consumer and many of them have very poor reception as well. The reason that I even became an XM listener to begin with was because of choice and freedom in my media related preferences. This is absolutely unfair and an intrusion to XM radio and its listeners. Please do not infringe on or restrict our satellite radio customer rights. Thank you.
